Sir:

In response to the Office Action dated December 11, 2000, please amend the above identified application as follows:

IN THE CLAIMS

1. (Twice Amended) A method for automatic control of the transmission of an E-mail,

wherein a plurality of agent parameters controlling the behavior of an agent delivering an E-mail are appended to the main mail text having an appended mail header, the agent parameters are responsive to a send command designating the transmission of the E-mail for transmission to a recipient;

wherein the agent parameters are modified responsive to the contents of experiences reflecting the operating hysteresis for the agent; and further

wherein an E-mail of a pre-set illustrative sentence is sent by said agent to [the recipient] a user of the agent based on said agent parameters.
